VALORISATION OF ANCIENT FARMING TECHNIQUES IN RESILIENT AND SUSTAINABLE AGRICULTURE

Project no. 612501-EPP-1-2019-1-IT-EPPKA2-KA

The project VALOR promotes the recovery, conservation, and enhancement of the ancient local cultivation conditions, through innovative educational curricula that support trainers and farmers to increase their abilities to preserve and safeguard ancient production techniques and valorize and promote local traditional identities and economies.

AGROECOLOGY, RESILIENCE

Agro-ecology is based on the application of ecological concepts and principles to optimise the interactions between plants, animals, humans and the environment, while considering the social aspects that need to be addressed for a sustainable and equitable food system.

VALOR training addresses topics relevant to Agro-ecology:

VALOR

VALOR "Valorisation of ancient farming techniques in resilient and sustainable agriculture"

Project impact
Short term benefits for

HEIs:

- propose novel contents and curricula relating to biodiversity and bioeconomy;
- be involved in European networks of excellence where cooperation increasingly adds value;
- offer innovative learning tools dedicated to adult training;
- strengthen and/or widen collaboration with national parks and other relevant stakeholders
